Acknowledging the medal and Franklin's favor of May 16th. Delay in the printing of his book; acknowledging Franklin's permission to dedicate it to him. His opinion of the biography of Sir John Pringle by Dr. [Andrew] Kippis, his theological friend, who contributed to fix his anxious mind upon "Socinianisme" as being, in his opinion, the most rational and the only good religion. A paper he intends writing for which he desires philosophical anecdotes about Franklin; begs for a description of the two electrical explosions by which Franklin was hit; description of a like experience to himself;<sup>1</sup> received a severe electric shock whilst making experiments in electricity. Was rendered unconscious for ten or fifteen minutes. Highly injurious effects he felt mentally and physically on first regaining consciousness. After twenty-four hours experienced renewed vigor and great improvement in all his mental faculties; felt much better and stronger than before the shock. Thinks the insane might perhaps be restored to their mental faculties by an electric shock administered to them. Would not however advise anyone to try it on himself. Wishes to publish Franklin's invention of a clock with only three wheels, as well as the curiosity of the globe; begs for his reflections on chimneys. Chances of a war with the Turks, and the danger of having the plague; their custom of fumigating all letters from the East; this is now to be abolished; bewails this criminal act. Application made to him by the Princess of Lichtenstein to intercede with Franklin on behalf of Lady [Juliana] Penn. No satisfactory news from Mr. [Samuel] Wharton or [Francis] Coffyn; cannot believe the former is a sharper. Newspaper report that the American people are unwilling to contribute anything to support the public credit. A. L. S. 6 p.

L. S. 4 p.

XXXIII, 133.

Enclosure. Acknowledgment of the receipt on February 29, 1780, by Samuel Wharton from Dr. John Ingen Housz, of 8000 livres

tournois, being the amount of his interest in several cargoes of merchandise which Mr. Wharton is sending to Philadelphia to be sold. Undertook another mercantile adventure with Mr. Wharton, Mr. [Francis] Coffyn, and Dr. [Edward] Bancroft. Mr. Wharton promised on his arrival in Philadelphia to send his remittances on account of this venture, through their common friend, Dr. Franklin, but has never written a single letter. On November 15, 1781, Mr. Coffyn wrote him that he had received from Mr. Wharton a remittance of 9,140 livres which he had kept for himself as a part of what he loaned to Mr. Wharton to complete his share in their joint undertaking. By another letter of May, 1782, Mr. Coffyn informed him of having received a second remittance of 19,140 livres, destined for their joint concern. Of this sum Mr. Coffyn took for himself the greater part, only sending to Dr. Ingen Housz 1,800 livres, pleading in excuse that he paid himself by it the remainder of what he had loaned to Mr. Wharton, or paid for him in their part of the venture. Mr. Coffyn received again in October, 1783, a remittance of 5,000 livres, of which he sent Dr. Ingen Housz 2,484 livres. Dr. Ingen Housz complained to Mr. Wharton of Coffyn's behavior, but got no answer. He received from Mr. Samuel Lewis Wharton, under date of July 9, 1783, 8,000 livres for his own account. Notwithstanding Mr. Coffyn's conduct he had lately endeavored to get Dr. Ingen Housz to join him in a letter of attorney to force Mr. Wharton to pay them what he owes, which he does not understand, as Mr. Coffyn had already paid himself much more than his share amounted to, and he refused to give the power of attorney. Dr. Ingen Housz received back the capital sum of 8,000 livres, laid out in a mercantile undertaking directed by Mr. Samuel Wharton, but the profits of the undertaking, which must have been considerable, is still owing to him. Of the sum of 12,691 livres employed in the venture directed by Mr. Coffyn, and near 1,000 livres paid afterwards for the expenses of transportation, he received only 3,284 livres, thus the greater part of the sum employed and all the profits are still owing to him. Mr. John Williams of Boston, under date of December 28, 1782, informed him that he had invested in his name in the Loan Office in Boston \$7,000 at six per cent., also that he had another sum which he kept at Dr. Ingen Housz's disposal, for which he will pay him the same rate of interest as the Congress notes draw. Dr. Ingen Housz gave him orders to remit this sum with the interest on the Loan Office certificates, but he has never received an answer to this order. A. Mem. 4 p.

On his return from a little tour through Flanders and Holland, he found a duplicate of the papers sent him, and among them the address that had been omitted before. Advises that the Address on His Majesty [George III]'s nuptials and congratulation on his accession be blended, and that the other matter be touched in a memorial or petition by itself agreeable to Mr. Wood's advice; which if done, Dr. Franklin is persuaded will be attended with good effect. The Proprietors' and Governor's friends possessed the Ministry with the opinion that the failure of supplies in the Province is due to the Assembly's obstinacy and their disinclination to His Majesty's service. Thanks him for applying to Mr. Green concerning his old account. The retaining of Canada is now become a popular point. (Incomplete.)

Is afraid we have many more rebels among us than we were aware of. Among others they that have not registered the weight of their plate and paid the duty are all rebels; to whom may be added the acting rebels that wear French silks and cambrics. The petition is from a number of private persons, merchants of New York, stating their opinion that several restraints in the Acts of Trade laid on the commerce of the Colonies are not only prejudicial to the Colonies but to the mother country. Those reasons are to be judged of here, and if good and are supported by facts, instead of censure those merchants might deserve thanks; if otherwise, the petition may be laid aside. Petitioning is not rebellion. A. L. S. Friend to both countries. (Fragment.) 1 p. L(ii), 12d.

*To [John] Foxcroft.* 1772. February 4. London.

Common error in friends to make comparisons and depreciate the merits of others. Not necessary to do so in this case. Mr. [Samuel] Wharton will have a good deal of merit in the affair [the Walpole grant] if it succeeds, he having been exceedingly active and industrious in it. But though he [Dr. Franklin] has not been equally active his advice may have been thought of some use, since it has been asked on every step and he believes he has lent some weight to the negotia-

tions by his joining in the affair, from the greater confidence men are apt to place in one they know than in a stranger. As he neither asks nor expects any particular consideration for any service he may have done, he only thinks he ought to escape censure. Let all do their endeavors in their special capacities, and if one has the ability or the opportunity of doing more for his friends than another, let him think that a happiness and be satisfied. The business is not yet completed and as many things happen between the cup and the lip perhaps there may be nothing of this kind for friends to dispute about. Adjustment of their private accounts. **To Mme. Brillon. [Circa 1778.]**

Only sees one defect in her which consists in a kind of sentimental avariciousness or a desire to restrict and monopolize all his affection and not allow him to bestow any of it on other charming women. She

is wrong in thinking that his affection cannot be divided up amongst a number of persons without loss to herself. Maintains that esteem, admiration, respect and even affection may be extended to a number of objects. She has no right to complain, moreover, as she excludes everything material from their relations and only allows him a few polite kisses now and then, such as she might give to her young cousins. Thinks he would have more reason to complain of her harsh treatment of his affections. Does not wish to be at war with her and proposes that they sign a treaty of peace. Mr. [John] Adams. The Report [on Mesmerism] makes a great deal of talk. Everybody agrees that it is well written, but many wonder at the force of imagination described in it as occasioning convulsions, etc., and some feel that consequences may be drawn from it by infidels to weaken our faith in some of the miracles of the New Testament. *To Mme. Brillon. [Circa 1784.]*

She is too sensitive and kind-hearted and he gives her some advice. Ingratitude is a terrible evil, but it only hurts the ungrateful. If those whom she has benefited prove ungrateful, it is their crime and should not disturb her. Those who have heaped injuries on her in return for benefits have only lowered themselves and become inferior to her. She should not seek to be revenged on them; time will prove the rectitude of her conduct and those who have slandered her will seek her friendship. Hopes she will be able to make out his meaning in spite of the defects and clumsiness of his style in French. A. Dr. of L. 2 p. (In French.) XLVI(i), 43.

The periodical compilation he proposes seems to be a novel idea. Such a work, if well executed, recommends itself; and if it is not well executed, it will not be helped by any other recommendation.
